RISK ALERTS

Leveraged ETF institutional loading = poor timing signal; avoid leveraging into this rally

Small-cap IWM lagging +0.89% while SPY/QQQ rally; potential breadth divergence warning

20 earnings reporters today + major names (KR/ACN/KMX) this week; volatility expansion expected

VIX estimated 14–16 (complacent); profit-taking risk if any macro surprise (Fed, inflation data)

Portfolio at +1.88% to +3.13% intraday; trim 2.5% on winners breaking +10% from entry; lock gains

Wheel book assignment risk elevated pre-earnings (PLAY, KR, KMX); skip or go far OTM this week

FINAL CIO VERDICT

RISK POSTURE

Aggressive

CAPITAL SHOULD FLOW TO

Deploy 60–70% into SPY/QQQ breakouts + XLK sector rotation; 20% wheel premium capture on C/SPY support zones; 10–20% cash/dry powder for post-earnings consolidation and dip-buying next week. Institutional rotation into Real Assets/ Infrastructure ETFs (IJR, passive reshoring plays) = secondary allocation 10–15% of equity capital.

AVOID COMPLETELY

Unprofitable growth tech being dumped; leveraged ETF exposure (institutional poor-timing signal); small-cap exposure (IWM lagging) until breadth confirms; pre-earnings wheel assignments on PLAY/KR/KMX; naked options; margin. Sit out PLAY binary until post-earnings volatility settles.
