SPY	Broad Market	35-40	30	45

HOLD	BA	Industrial broadening on energy/reshoring cycle; no weakness; target $225 on breakout; let it run
TRIM	AAPL	Down -1.94% on heavy vol; if holding >5% size, trim 2.5% on bounce to $308-$310; risk of further weakness below $300
WHEEL-SELL	SPY	Flat market with oil spike = premium selling opportunity; sell 30-delta puts at 2-3% OTM for 30-45 DTE
EXIT	LYFT	If position >3%; take profits on breakout to $14.20-$14.50; small-cap momentum fades fast
BUY	DUOL	Extreme vol +1.31x; breakout above $120; enter on 3% dip; target $125; stop $115
HEDGE	QQQ	Growth weakness despite +1.52%; AAPL breakdown = hedge QQQ with 5-10% put spread (15-20 delta) for 30 DTE

Oil spike +5.7% (WTI $95.86) signals inflation expectations rising; watch 10Y yield for >4.4% break (risk-off trigger)

AAPL -1.94% on 2.6M vol = breadth deterioration in QQQ; below $300 = potential tech cascade

Nikkei -3.66% overnight suggests weak Asia backdrop; monitor Asia open Tue for contagion risk

Earnings week volatility: ORCL Wed + ADBE Thu = binary events; position sizing into them is high-risk

Growth/unprofitable tech lagging; avoid shorting but trim sizes; momentum not sustainable above $300 in AAPL

FINAL CIO VERDICT

RISK POSTURE

Aggressive in cyclicals/value; Defensive in growth/ unprofitable tech

CAPITAL SHOULD FLOW TO

Rotate 15% of growth holdings into XLK/BA/ ARM; build 30% wheel premium-selling book on SPY/QQQ; reserve 10% cash for dips below -1.5%

AVOID COMPLETELY

Unprofitable SaaS; short-duration growth (avoid ADBE/ORCL shorts into earnings); naked option selling; AAPL below $300 unless strong buyer appears
