RISK ALERTS

- ⚠ NVDA earnings after close = max intraday vol; broad semis/AI read-through risk
- ⚠ WMT earnings Thu premarket = consumer sentiment / tariff inflection point

⚠️ Oil geo risk (US-Iran) can spike without warning; monitor headline flow

⚠️ Energy complex divergence (oil +1.15% but XOM -3.37%, HAL -1.42%) = institutional rotation underway

⚠️ Yields retreated AM but multiyear highs remain; watch 10Y retest as macro headwind

⚠️ VIX elevated vs. early month (est. 16-18); position sizing critical into earnings

FINAL CIO VERDICT

RISK POSTURE

Neutral-to-Aggressive on dips; earnings event volatility managed via position sizing

CAPITAL SHOULD FLOW TO

50% dry powder post-NVDA for WMT/earnings cascade; 20% premium income (wheel); 30% tactical setups

AVOID COMPLETELY

XOM/energy longs into geo headlines; avoid broad small-cap momentum pre-NVDA; avoid naked calls
