RISK ALERTS

MU earnings TODAY post-bell: >6% IV move possible; hard stop losses at 7% above entry; manage ER gap risk

NNOX >50% IV imply; extreme speculation; cap position 2% risk; close straddle short 2 days before ER if ITM

SpaceX IPO today may pull retail bid from equities late PM; watch for liquidity squeeze 3-4 PM ET

10Y yield at 4.49% stable; if yield spikes 15+ bps intraday = risk-off trigger; monitor DXY for USD strength reversal

Tech sector (-1.07% XLK early) showing weakness; if MU misses, expect -3% QQQ reversal into defensive rotation; watch XLP/XLY bid

FINAL CIO VERDICT

RISK POSTURE

Neutral-to-Aggressive into earnings catalysts; take profits if +8% above 10% baseline; scale size 4-5k per name max

CAPITAL SHOULD FLOW TO

Deploy 60% into earnings beat plays (MU, TTAN, SNX, XAIR, DRI); hold 25% dry powder for post-ER dips; reserve 15% wheel income reinvest

AVOID COMPLETELY

Avoid XLY, XLP, XLRE—low estimate revision. Avoid naked long gamma (NNOX, BB) without straddle hedge. Avoid size above 8% single ticker. Avoid chasing SpaceX IPO retail bid late PM. Avoid breakeven trades—require 3% min edge.
