

CIO EXECUTIVE SUMMARY

- ▶ Small-cap outperform (IWM +0.93%) signals risk-on tilt; oil +1.15% = inflation/geopolitics lens
- ▶ Tech holding but selective: AMD/SMCI/ZS rip on volume; growth names (COIN -4.46%, SHOP -1.72%) lag
- ▶ Monday earnings slate (10 names) + CRM/SNOW/MRVL/COST later week = volatility driver
- ▶ VIX unknown but oil strength + modest breadth suggest 15-18 range (healthy trend, not complacency)
- ▶ Rotation thesis confirmed: value/industrial/defense (MRK +5.66%, LLY +2.28%, NOC +0.84%) outpace unprofitable growth

MACRO DASHBOARD

SPY TREND

Neutral-bullish, +0.4% on light volume; futures +18bps overnight

RISK ALERTS

-  Oil +1.15% to 113.70 = inflation bid; watch 10Y yield for breakout >4.5% risk-off trigger
-  Earnings slate (10 Mon + major Wed/Thu names) = elevated gamma/vega risk; reduce position size into events
-  COIN -4.46% cascade = crypto leverage unwind risk; monitor for systemic bleed into equities
-  Growth underperformance (SHOP -1.72%, UBER -2.42%) vs value/industrial outperform = rotation structural; trim unprofitable growth exposure
-  VIX unknown; if >20 on open, shift to defensive / reduce wheel premium-selling activity

FINAL CIO VERDICT

RISK POSTURE

Neutral

CAPITAL SHOULD FLOW TO

60% deployed into quality breakouts (AMD/MRK/LLY); 20% ready for dips (COIN/SHOP support); 20% cash for earnings volatility

AVOID COMPLETELY

Pure-growth / unprofitable SaaS (SHOP near-term); high-beta crypto (COIN); unhedged small-cap into earnings week
