

CIO EXECUTIVE SUMMARY

- ▶ Tech selloff (-2.47% XLK) masks institutional rotation INTO safety/defense (AXON, EVLV, ARKX + \$45M)
- ▶ FOMC minutes 2PM catalyst: hawkish tilt expected; futures muted (+0.10% SPX) = contained risk
- ▶ Trump-Xi summit geopolitical overhang priced in; no panic puts; net bullish skew industrials/electronics
- ▶ 177 earnings today (UAA, QBTS, CEG vol spike); small-cap biotech/quantum momentum but low conviction
- ▶ Capital deployment: Fade XLK weakness, rotate into XLI/electronics (BW +4.1%, 500K block premarket)
