

CIO EXECUTIVE SUMMARY

- ▶ Futures flat; Iran geopolitical noise containable; ZS crater (-31%) dominates vol; META/ENPH/TSM/MU leading breadth
- ▶ CRM/SNOW/MRVL earnings TODAY; COST/DLTR/ANF/DKS/AZO tomorrow; retail earnings cycle = vol magnet
- ▶ Sector rotation = Industrials/ Materials/Energy outperforming; Tech momentum narrowing but chip strength (MU/TSM) resilient
- ▶ WTI +1.15% (113.70); oil-sensitive names (XLE, IYE) favorable; defensive tilt emerging on macro uncertainty
- ▶ Portfolio = neutral; trim winners; use dips into support as ADD opportunity; wheel premium into strength

RISK ALERTS

⚠ ZS -31% collapse = sector contagion risk; monitor cyber-sec peers (CRWD, NET, PALO)

⚠ Iran geopolitical noise = VIX cap; if escalates above 20 = risk-off trigger activated

⚠ CRM/SNOW earnings binary TODAY; position sizing = 2-3% max per name; stop at -7%

⚠ JPM/BAC -2% down; bank weakness into rate/credit uncertainty; hedge via GLD or TLT

⚠ WTI +1.15% = energy vol play; geopolitical premium unsustainable long-term; take profits 114.50+

FINAL CIO VERDICT

RISK POSTURE

Neutral

CAPITAL SHOULD FLOW TO

40% positioned (META, MU, TSM, ENPH, BA, XLE); 10% cash; wheel premium into strength; rotate into cyclicals/real assets vs tech

AVOID COMPLETELY

ZS (crater), COIN (crypto FUD), SOXL (decay risk), unprofitable thematic growth, high-beta speculative names into earnings
