RISK ALERTS

- ⚠️ Geopolitical tail risk (Iran escalation) not fully priced; equity hedges recommended if VIX breaks 20
- ⚠️ Sector dispersion extreme (36/45 sectors red); avoid broad index long; isolate to institutional favorites only

⚠️ HOOD +11.22% is parabolic; retail FOMO tail; avoid chasing; exit any position above 95

⚠️ Earnings calendar dense (22 reporters today); post-earnings gaps risk; use tight stops on new entries

⚠️ Oil waiver temporary; watch WTI intraday; if bounces above 90, energy shorts at risk; geopolitical bid could spike VIX >25

FINAL CIO VERDICT

RISK POSTURE

**Neutral
(Selective
Long)**

CAPITAL SHOULD FLOW TO

Deploy 60-70% into CRWD, DDOG, AVGO breakouts; hold 20-25% dry powder for dip buys below support; 10% hedges (VIX calls / energy shorts)

AVOID COMPLETELY

TSM until 415 support tested; WMT / retail shorts below 118; broad QQQ/SPY longs; any stock chasing HOOD parabolic move; naked puts in geopolitical-sensitive names (oil, defense). Exit ENPH divergence vs SEDG.
