RISK ALERTS

- ⚠️ Iran geopolitical escalation: crude bid +1.15% intraday; stagflation impulse; watch yield + dollar
- ⚠️ Earnings night: NVDA, WMT, HD massive catalysts; 30-35 ES expected move; position sizing critical
- ⚠️ Tech high-beta at risk: NQ -0.55% premarket; QQQ vulnerable to fade strength; consider hedges
- ⚠️ Extreme single-day moves (IONQ +10.95%, ENPH +15.66%): profit-take volatility spike risk; no new entry
- ⚠️ Sector rotation away from unprofitable AI: crowded growth exit signal; take profits in high-beta names

FINAL CIO VERDICT

RISK POSTURE Neutral—lean defensive into earnings; reduce high-beta tech exposure;	CAPITAL SHOULD FLOW TO 70% deployed into PAVE/XLE/XLI (real assets rotation); 20% JEPI/FEPI (income overlays); 10% dry powder for dips post-earnings	AVOID COMPLETELY Unprofitable thematic growth; crowded AI momentum; rate-sensitive real estate; excessive leverage into earnings night
