TRIM

IONQ

+18% pop is overextended; take 50% at \$58; stop remaining at \$55 (avoid vol crush)

RISK ALERTS

⚠️ CPI print 2:30 PM: 2.4% YoY (exp) vs 2.5% prior; breakeven +10bps on yields; SPY 7,425 support critical

⚠️ Iran geopolitical premium embedded in oil; WTI up +3-5% overnight; tail-risk if escalation; monitor vol regime

⚠️ VIX 12-13 complacency masks tail hedging; Polymarket 67% bullish; aggressive positioning warns of 2-3% drawdown

⚠️ WMT -2.59% unusual; retail weakness or inflation signal? If breaks \$125, defensive cascade possible

⚠️ IONQ +18% premarket: momentum overdrive; vol crush risk post-4PM lockup; trim 50% at open

FINAL CIO VERDICT

RISK POSTURE

Aggressive

CAPITAL SHOULD FLOW TO

Deploy 60% (\$30K) into AXON/EVLV/HIMS breakouts; hold 20% (\$10K) cash for CPI dip-buy; hedge 20% (\$10K) SPY calls vs Iran vol

AVOID COMPLETELY

Naked puts below \$1 stock price (BTCS/RRGB unless wheel); SaaS mega-cap (CRWD/SNOW) in rotation; WMT unless support holds; over-extended momentum >+15% premarket (IONQ trim)
